

Godrej Security Solutions eyes INR 50-70 Crore Revenue with expansion into Health Security Segment

Chennai, May 13, 2020: **Launches COVID Defense range with Vigi-Guard a turnstile with sanitizer dispenser and Thermal Camera optimized for elevated body temperature screening.**

Godrej Security Solutions (GSS), the leading player in future technology in security systems, announced their venture into the health security segment with the COVID Defense Security Range of products and eyes a revenue of INR 50-70 Crore. Godrej was founded on a deep commitment to serve our communities and people. The products are designed and launched as part of our endeavor to meet the current challenging needs and need gap across industries such as Oil and Gas, BFSI, Defense, Police, Infrastructure, Airports, Seaports, Hospitals and many others.

The Vigi-Guard turnstile with sanitizer dispenser and the Dual Sensor Thermal Camera for elevated body temperature screening will help India adapt to the new normal in ensuring health security. The industries of future will have to bolster their security solutions as health becomes the top most priority in ensuring complete protection of patrons.

The industries and work-places of future will have to ensure minimum human interference in ensuring physical and health security. The Vigi-Guard range of Turnstiles, with an innovation in the construction offers a provision made for a sanitizer dispenser at the entrance of any premise. The product is designed to adhere to the directives for Social Distancing of M H A which highlights "Touch free mechanism". The product ensures a secure entry and restricts the entry of any person who has

not disinfected their hands and can also be retrofitted to existing Godrej turnstiles and flap barriers. For superior protection, this also can be used alongside Godrej's Facial recognition system with Temperature Sensing.

Godrej Security Solutions is working with various state and central Health departments and will be focussing on cities/places where there is a higher percentage of positive cases. In the first phase, these will be used in hospitals, healthcare facilities and other commercial establishments like grocery stores to ensure quick access along with sanitization and temperature check.

The products are presently available directly from GSS at their Mumbai facility.

Commenting on this initiative, Mr. Pushkar Gokhale, Vice President and Head of B2B, Godrej Security Solutions said, "These are unprecedented times

and as a leader in the security space, it is our responsibility to innovate and help the nation practice new hygiene norms when they start getting back to a normal life. This product innovation has been possible due to the tireless efforts of our design team who studied the market need and devised the products in only two weeks. This will aid the country to take a step towards public health safety and reduce the spread of virus. GSS has collaborated with the Government bodies to make the product in adherence to norms so that industries can quickly adopt the mechanisms, reduce chances of transmission of COVID-19 and Restart the Right Way."

Godrej Security Solutions has always been on the forefront of ensuring public safety and has worked in the benefit of the country's citizens when it comes to fighting against crisis.
