

Godrej Security's new product

Hyderabad: Godrej Security Solutions (GSS), the leading player in future technology in security systems, announced its foray into the health security segment with the Covid defence security range of products. The products are designed and launched as part of our endeavor to meet the current challenging needs and need gap across industries such as oil and gas, BFSI, defense, police, infrastructure, airports, seaports, hospitals and many others.

Pushkar Gokhale, Vice President and Head of B2B, Godrej Security Solutions said, "These are unprecedented times and as a leader in the security space, it is our responsibility to innovate and help the nation practice new hygiene norms when they start getting back to a normal life."
