

Godrej Security Solutions rides on innovation

Chennai Aug 3:

Godrej Security Solutions (GSS), India's largest provider of institutional security solutions, safes, bank vaults and locker, today announced that it would strengthen presence in Tamil Nadu through a range of innovative products in the institutional space.

For the banking sector, the company has introduced a robotic locker, Autovault. For the gems and jewellery, it has introduced Defender Prime Neutronics safe.

Autovault offers easy accessibility and high security as its installation mandates six walls of the strong room to be treated with reinforced cement concrete (RCC). The walls can also have built-in sensors to activate an alarm in case of tremors or attack. Furthermore, since the robotic system only fetches the locker

of the account holder, it restricts access to the vault room.

For jewellery segment, the company has introduced Defender Prime Neutronics safe which is equipped with advanced features such as iAlert and Duress Alarm. In the event of a burglary attempt on the safe, iAlert triggers a loud local alarm via a hooter and sends an SMS alert to up to eight registered phone numbers including the nearest Police station. Pushkar

Gokhale, Vice President and Head of B2B, Godrej Security Solutions said,

"We at Godrej Security Solutions have always thrived towards improving and reinventing ourselves to provide novel, efficient and easy to use solutions which ensures 'peace of mind' for our customers. With our latest range of innovative and advanced security solutions for jewellery market, we aim to help cities across south India improve its defence against crime."
