Pune: Have you forgotten to lock the door after stepping out and not even realised it till much later? Well, if your answer is yes, then you are among the estimated 25 per cent of PuneKars who leave your home vulnerable to theft. Even though the crime rate in the city has been rising rapidly, it seems that PuneKars are least bothered about the safety and security of their belongings.

According to a recent survey conducted in various parts of the city, at least 25 per cent residents had forgotten to lock their homes before stepping out.

The observation was made in a survey conducted by a Security Solutions firm over the period of three months in different parts of the country. Nearly 250 citizens from the city were contacted in person during the survey.
